ARTIFICIAL INTELLIGENCE APPLICATION DEVELOPMENT AND JIRA PRACTICAL JOURNAL

Simple, Exam-Friendly Practical Steps

Note: Jira menus and available options may vary depending on the account, project type, and permissions.

Practical 1: Jira Setup & Project Creation

A. Create a Jira Cloud account and explore the dashboard

- Open the Jira Cloud website.
- Sign up or log in using your account.
- Open the Jira dashboard.
- Explore the available menus and project options.

B. Create a Company-managed Scrum/Kanban Project

- Open Jira and go to Projects.
- Click Create project.
- Select Scrum or Kanban.
- Choose the Company-managed project type, if available.
- Enter the project name and key.
- Click Create.

C. Configure project details

- Open the created project.
- Go to Project settings.
- Update the project name and details, where available.
- Configure the project settings as required.
- Save the changes.

Practical 2: Team Creation & Role Assignment

A. Add Team Members

- Open your Jira project.
- Go to Project settings or People.
- Click Add people.
- Enter the team member's email address or username.
- Select the appropriate access or role.
- Click Add.

B. Assign Roles

- Open Project settings.
- Go to People or Permissions, depending on your Jira setup.
- Select the team member.
- Assign the appropriate project role, such as Administrator, Developer, or Viewer, if available.
- Save the changes.

Practical 3: Issue Types & Configuration

A. Create and configure issue types (Epic, Story, Task, Bug)

- Open your Jira project.
- Go to the Backlog or Issues section.
- Click Create.
- Select the required issue type.
- Enter the issue summary and description.
- For an Epic, enter the Epic name if prompted.
- Click Create.
- Repeat for Story, Task, and Bug.

B. Create Components and Versions

- Open Project settings.
- Select Components.
- Click Create component.
- Enter the component name and save it.
- Open Versions or Releases.
- Click Create version.
- Enter the version name and any required details.
- Save the version.

Practical 4: Issue Management

A. Create issues under an Epic

- Open your Jira project.
- Go to Backlog.
- Create an Epic.
- Create a Story, Task, or Bug.
- Select the Epic link or parent field.
- Choose the Epic under which the issue should appear.
- Click Create or Save.

B. Assign issues to users and set Priority & Due Date

- Open the required issue.
- Click Edit.
- Select a user in the Assignee field.
- Set the Priority, such as High, Medium, or Low.
- Enter the Due Date.
- Click Update or Save.

Practical 5: Workflow Customization

A. Design a custom workflow

- Open Jira settings.
- Go to Issues and select Workflows, if available.
- Click Add workflow or Create workflow.
- Enter a workflow name.
- Add statuses such as To Do, In Progress, and Done.
- Save the workflow.

B. Add transitions and conditions

- Open the custom workflow in edit mode.
- Add transitions between statuses.
- Configure conditions for transitions, if required.
- Save your changes.

C. Publish and associate the workflow with a project

- Publish the workflow draft.
- Open Workflow Schemes in Jira settings.
- Create or edit a workflow scheme.
- Associate the workflow with the required issue types.
- Assign the scheme to your project.
- Confirm the changes.

Practical 6: Scrum Board & Sprint Management

A. Create and configure a Scrum Board

- Open Jira.
- Go to Boards and select Create board.
- Choose Scrum board.
- Select a board based on an existing project or create it from a saved filter.
- Enter the board name.
- Select the project or filter.
- Create the board.
- Configure its columns and settings.

B. Create and start a Sprint

- Open the Scrum board.
- Go to Backlog.
- Click Create sprint.
- Add issues to the sprint.
- Click Start sprint.
- Enter the sprint name, duration, start date, and end date.
- Confirm Start.

C. Complete Sprint and generate Sprint Report

- Open the active sprint.
- Move completed issues to Done.
- Click Complete sprint when the sprint ends.
- Confirm the completion.
- Open Reports.
- Select Sprint Report.
- Choose the sprint to view its report.

Practical 7: Kanban Board Management

A. Create a Company-managed Kanban Project

- Open Jira.
- Go to Projects and click Create project.
- Select the Kanban template.
- Choose Company-managed, if available.
- Enter the project name and key.
- Click Create.

B. Configure Kanban Board

- Open the Kanban board.
- Go to Board settings.
- Select Columns.
- Add or rename columns such as To Do, In Progress, and Done.
- Map the appropriate statuses to each column.
- Set a work-in-progress limit if required.
- Save the configuration.

C. Track issue progress

- Open the Kanban board.
- Create issues or add existing issues.
- Move issues between columns as their status changes.
- Check each issue's assignee and priority.
- Monitor the board to track ongoing and completed work.

Practical 8: JQL & Filters

A. Write basic JQL queries (Status, Assignee, Priority)

- Open Jira.
- Go to Filters and select Advanced issue search, if available.
- Switch to JQL mode.
- Enter a query based on the required condition.

Example JQL queries

```
Status: status = "In Progress"

Assignee: assignee = currentUser()

Priority: priority = High
```

- Click Search.
- Check the displayed issues.
- Click Save as to save the filter, if required.

Practical 9: Jira Automation

A. Create an Automation Rule (Trigger → Condition → Action)

- Open your Jira project.
- Go to Project settings or Automation.
- Click Create rule.
- Select a trigger, such as Issue created.
- Add a condition, if required, such as Priority equals High.
- Add an action, such as Assign issue or Add comment.
- Enter the required action details.
- Name the automation rule.
- Turn on or enable the rule.
- Test the rule by performing the trigger action and checking the result.

Practical 10: Introduction to Jira Mobile App

A. Install and configure the Jira Mobile App

- Open Google Play Store on your mobile.
- Search for the Jira app.
- Install the app.
- Open the app.
- Log in using your Jira account.
- Select your project.
- Explore the dashboard and issue list.

B. View and update issues from mobile (Status, Comment, Assign)

- Open the Jira mobile app.
- Select your project and open an issue.
- View the issue details.
- Update the issue status using the available status option.
- Open the comment section and add a comment.
- Open the Assignee field.
- Select the required user.
- Save the changes.
- Reopen the issue to verify the updates.

Quick Revision Tip

Practical 1 creates a project; Practical 2 manages team members; Practical 3 configures issue types; Practical 4 manages issues; Practical 5 customizes workflows; Practical 6 manages sprints; Practical 7 tracks Kanban tasks; Practical 8 searches with JQL; Practical 9 automates tasks; and Practical 10 uses Jira on mobile.

Exam note: The exact menu names and available options can vary according to Jira account, project type, and user permissions.
